- Maintenance & Support
- Project Design & Management
- Team Recruiting & Leadership
- Cross-Functional Collaboration
- Client Support

## PROFESSIONAL EXPERIENCE

### **1000Farmacie, Remote Front End Lead**

**2/2023 – present**

I have joined as **Front End Lead** at a dynamic startup marketplace. I built development processes in the team, fixed fundamental issues of application building, upgraded the tech stack, improved SEO, and increased the company's revenue. Released many new pages, components, and user abilities. Worked closely with 3rd party companies to implement and improve integration of services including Google Ads, Facebook Pixel, Optimonk modals, Clerk Personalization, etc.

### **Svitla Systems, Inc., Remote Senior Frontend Developer**

**1/2019 – 12/2022**

Ensured stellar performance of crucial platforms and tools as a senior front-end developer, steering a team of development and UI professionals in designing, testing, and executing innovative and engaging interfaces. Partnered with clients to shape and deliver custom applications and technology solutions.

- **Create Me:**
  - Collaborated on creating an innovative application for physical kiosk devices, enabling customers to order/purchase materials in real-time.
  - Delivered kiosk and standalone mode for USA/UK rollout, creating the from-scratch multi-page application for production.
  - Collaborated with designers to unify and optimize UI/UX and customization.
- **Noodle Learning Platform:**
  - Designed and launched new functionalities for the cutting-edge educational platform, driving UI/UX improvements to meet user needs.

## LANGUAGES

English  
Ukrainian  
Russian

- Improved development processes to enhance platform stability and production readiness. Delivered accuracy through timely feature launches.
- Enabled the delivery of captivating educational content, providing seamless user access to materials.
- Developed innovative, eye-catching visuals, leading UI staff in developing SVG animations based on JSON data and cross-devised adapted experiences for market-leading experiences.

- **Clearstream/Deutsche Börse Group Companies:**

- **Led** portal improvement developments, significantly improving upload and validation processes through automation implementation.
- Developed and initiated key security and performance initiatives to provide top-tier, all-day stability within the client-critical portal.
- Designed and developed a live single-page application (SPA) process, embedding multiple interval actions and creating all-new upload processes for optimal efficiency.
- Governed SPA to maximize bank and employee collaboration processes within protected Financial Security documents.

### **Infront X (previously Omnigon Communications LLC)      2/2015 – 12/2018** **Senior Frontend Developer, Kyiv/Remote**

Partnered with diverse clients to provide dynamic, reactive interfaces for client application and website needs. Led cross-functional project teams, including designers and UI/UX developers, to shape impactful tools in line with unique client and user requirements.

- **PGA Tour:**
  - Maximized the performance and capabilities of the US's premiere golf website, enable streamlined, highly accurate information sharing.
  - Steered component migration initiative, transitioning features from jQuery to React for optimal performance and up-to-date functionality.
  - Completed a 99.8% coverage with unit test.
- **The Corebine CMS:**
  - **Led** a small team in the design and execution of an all-new Content Management System (CMS) for creating sport-related websites, transforming content management capabilities.
  - Successfully developed product over a one-year timeframe, with completion of product demo website in three months.
  - Enabled rapid website development (3-6 months) through new CMS implementation and application.

### **NOOSPHERE, Dnipro      9/2014 – 1/2015** **Frontend Web Developer**

Collaborated with the product team to develop an internal SPA, providing key capabilities for the Support Team.

- Designed and developed an all-new functionality, delivering new design and capability in line with business needs.
- Executed the migration from Ext JS 4 to Ext JS 5, eliminating major incompatibilities for optimal performance.

### **Independent, Dnipro      9/2009 – 9/2014** **Frontend Developer**

Consulted with small- and mid-range businesses to provide frontend development across a wide range of web initiatives. Built cross-functional, project-specific teams, recruiting designers, backend development, and writing talent to deliver on unique client website and application demands.

- Provided server-side rendering, delivering dynamic websites for diverse needs.
- Executed high-impact SEO and website promotion, elevating sites to Google and Yandex Top 10 to maximize client outcomes.
- Maintained products and applications, ensuring ongoing performance and capabilities for lasting client success.

## EDUCATION

**Master's Degree in Computer Systems, Energy, and Automation**  
National Metallurgical Academy, Ukraine
